Graves Park – Ancient Barrow

Tony Spillane
29th July 2019
Graves Park Barrow

- The Graves Park Barrow has been measured, including the six post holes
- The Barrow itself is approximately 15m diameter
- There is a slight ridge surrounding the barrow, which is 33 – 36m diameter (similar to cover photo – from the internet)
- The six post holes appear to be a smaller triangle inside a larger triangle, with a north / south orientation (see scale diagram attached)
- The post holes have a hole diameter of approximately 25cm dia.
- The path over the Barrow has an orientation of approximately 60 deg West of North.
Graves Park Barrow - Location of Six Post Holes

Orientation of Pathway (284° NW)

Approx High Point of Barrow

247° deg N

Drawn to Scale:
1 cm = 0.5 m

Post Hole Diameters:
Approx. 25 cm dia
