

# ***Shadow Woods: A Search for Lost Landscapes - A Celebratory Evening***

6.30pm to 9pm, 27th November 2017 At Sheffield Hallam University's Charles St Building

**FREE EVENT** although booking is required.

Join us for an evening to celebrate our work with regional 'citizen scientists' and in particular, NBE research by Ian Rotherham, Naomi Holmes, and a number of our students in the fascinating search for lost woods and 'Shadow Woods'. We have a guest keynote lecture by BBC personality, author on garden design, on urban wildlife, and on water and flooding, and former government environmental advisor, Professor Chris Baines. Chris is a Sheffielder and an Honorary Doctorate of SHU.

## **The programme includes:**

First of all, there is chance to look at the research posters and display, and have a glass of wine, fruit juice and nibbles, and then an evening of lectures by Professors Chris Baines and Ian Rotherham. These start at 7 pm and continue to 8.15 pm with project displays and poster presentations in the foyer before and after the lectures. The displays will include information about the on-going SHU student project with Dr Naomi Holmes looking at pollen analysis and ancient trees in the Eastern Peak District. It will also include project displays on deer, sphagnum's healing harvest, shadow woods and two HLF-funded projects, *Norton's Flying Legacy*, and *Gillfield Wood: Water, Wood and Wildlife*, as well as a bookstall and details about SYBRG's events in 2018.

**Offers of displays and research posters are very welcome but need to be booked! Join us for the evening, or better still bring a poster and take part.**

## **On-line Booking Open until 24<sup>th</sup> November & contact details below:**

Further information and on-line booking available on the events page of our website: [www.ukeconet.org/wmwpsw.html](http://www.ukeconet.org/wmwpsw.html) , or to reserve a place, contact the SYBRG Conference Team, Venture House, 103 Arundel Street, Sheffield, S1 2NT, UK; Tel: 0114 272 4227 Email: [info@hallamec.plus.com](mailto:info@hallamec.plus.com)

**Organised by Professor Ian Rotherham of Sheffield Hallam University's Natural & Built Environment team, with partners South Yorkshire Biodiversity Research Group, the British Ecological Society, the Landscape Heritage Research Foundation, the Landscape Conservation Forum, and local groups**
